Investing in Technology Backbone

Architecture & Infrastructure

Launched Tech@Kotak Developer Portal:

In-house engineered solution designed to optimize long term total cost of ownership through package reuse, architecture simplification and modernization.

Observability platform built by Kotak Engineers:

Enhanced automated user journey tracking, probes and alerting mechanisms for key critical apps. This provides real-time visibility into system behaviours to enable rapid issue resolution, ultimately fortifying system reliability and performance.

AI & Builder Tools

Optimized App Testing:

CI/CD testing automation to enable substantial efficiencies in our testing process, resulting in significant time and cost savings.

Engineered a Core Platform for Conversational AI:

Internally engineered a core platform for future launch of conversational AI based banking services. Future AI business use cases will be enabled on this core platform.

Risk and Security

Implemented an automated Tool:

To consistently evaluate the security posture of public facing applications, ensuring ongoing protection and proactive defense against potential threats.

Enhanced Cybersecurity Controls:

Generated Software Bill of Materials (SBOMs) for 100+ in house applications. Reinforcing cybersecurity with precise component level insights for proactive risk management.

Data Analytics & Automation

Launched new ML model:

Combined traditional bureau data with granular banking relationship data to enhance credit preapproval decision effectiveness by over 20%.

Vehicle LOS:

Implemented Straight through processing (STPs) in Vehicle LOS. This has helped in reducing end to end timelines significantly (from customer sourcing to disbursement).

Backend fortification in the areas of in-house talent, well-engineered platforms and core capabilities helps us accomplish value generating outcomes in the customer facing digital space
